SOS300 Fire hose cabinet

Typical use:

For the storage of 1 x 15-25m fire hose and marine fire fighting nozzle for commercial shipping.

Description:

These cabinets are manufactured using highly UV resistant and very strong ASA injection moulded plastic. This makes them far more durable than GRP alternatives from other brands.

The door can be hinged on the left or the right hand side to suit tight machinery spaces (just rotate the cabinet so the door hinges in the desired direction). It is fitted with a very effective EPDM seal to prevent water/dust ingress.

The door latch is our well proven and totally reliable nylon/stainless steel rotary system. This can be fitted with an anti-tamper seal.

Inside the cabinet features marine bungy cords to hold the hose and nozzle firmly in place. These are easily released by pulling the nylon hook fitted to the bungy for rapid access in an emergency.

Standard specification:

Dimensions (mm)

Height x width x depth: 510 x 560 x 192

Internal depth 140mm

Weight Kg: 5Kg

Material specification:

Colour: Red
