Product data sheet

JB04 First aid cabinet

Typical use:

For the storage of First aid kits. Designed for use on and offshore. It is widely used by the world's top energy company due to its durability.

Description:

These cabinets are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 56. It has both Lloyds and ABS approvals.

The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the door aperture. The hinges are secured with 316 stainless steel nuts, bolts and washers.

The door can be specified with left or right hinging and features a polyamide handle to pull the door open to guarantee fast access in an emergency even when wearing gloves.
