

Helping to protect lives globally

JoBird®

BUILT BY THE BEST TO WITHSTAND THE WORST.

Product data sheet

JB76 Overhead Lifejacket Chest

Typical use:

For the storage of Lifejackets for cruise ships and Ferries. It has a drop down door to release the lifejackets onto the deck below. It can be mounted to a deck above or to a bulkhead if not suitable deck is available. The door is release by a single handle on a chain for rapid deployment in an emergency.

Description:

These chests are manufactured using Lloyds approved composites including UV resistant gelcoats to provide long lasting protection for equipment stored inside in even the harshest environments. This is backed up with an excellent IP rating of 56. The design ensures a high level of rigidity for the relatively low weight with a very effective EPDM seal around the lid aperture. It also has two doors in the front for Lifejacket loading.

Standard specification:

Dimensions (mm)

Height x width x depth: 686 x 2081 x 815

Aperture: 1935Wx 635H

Internal depth: 748

Weight Kg: 76 Kg
