Product **data sheet**

SOS400MK2

Typical use:

Ports, shore lines and Marinas

For the storage of 1 x 762mm lifebuoy and throwing line

Description:

This fully enclosed design was created with the assistance of the RNLI. It provides excellent protection of the lifebuoy and line from both rain and UV degradation. The round design with lifebuoy symbol makes it very easy to identify in an emergency. The double doors are opened using one hand and can be fitted with an anti-tamper seal to deter theft. The labelling of the housing is integrated into the moulding and so will not peel off.

Standard specification:

Dimensions (mm)

Height x width x depth: 930 x 918 x 210

Height including poles 1930

Weight Kg: 10Kg

Material specification:
